

Fred Adam

It's the first time that the 4 year Walking Art and Local Communities project partners have met in person and the excitement is palpable. Developing the partnership and writing a successful proposal to the EU for funding to support Walking arts has taken quite a few years.

Andrew Stuck is with **Fred Adam** one of the team from Gigacircus, the French partners in this pan European project. Fred and Andrew have met before and they have known each other for several years both sharing an interest in geolocated media, sound walks and digital storytelling

They are not exactly sure of their whereabouts having taken a cable car to a scenic point above the regional city of Guimaraes in north east in Portugal. They are in luck as they begin their conversation just as a church bell strikes. 23'30" 11MB

Notes from the podcast interview by **Andrew Stuck**: Recorded at Guimaraes, north east Portugal in March 202 and published in November 2024. <http://www.talkingwalking.net>

Gigacircus are the French partners: <https://gigacircus.net>

Fred Adam's artistic website <https://fredadam.net> , the Oika project website in Spain <https://oikaspain.com/> and the GPS Museum archive: <https://gpsmuseum.eu/>

Fred has been working with digital storyteller and sound walk composer David Merleau in Canada <https://hearyouare.ca/> developing Ant Venture: <https://antventure.ca/>

Deep Time Walk <https://www.deeptimewalk.org/> was developed with the Schumacker College, in Devon, UK and drew on the writing of Stephen Harding https://en.wikipedia.org/wiki/Stephan_Harding

Fred's suggested walk

1. Before taking any walk, open your senses to the nature you are within - experience the company of the birds, animals and plants. Share your love for walking contributing to environmental and social generation here and now.
